9:41 AWS VPC Quiz

👋 Welcome to the AWS VPC Quiz!
15 questions. Good luck!

Question 1 of 15 (Beginner):
What does CIDR represent?

A) DNS routing format
B) IP address range notation
C) Encryption method
D) Load balancing strategy

Type A, B, C, or D

B

✓ CORRECT!
CIDR defines IP address ranges such as 10.0.0.0/16.

Score so far: 1/1

Type A, B, C or D...

9:41 AWS VPC Quiz

Question 2 of 15 (Beginner):
Which AWS component must be attached to a VPC to enable internet connectivity?

A) NAT Gateway
B) Route Table
C) Internet Gateway
D) Security Group

Type A, B, C, or D

C

✓ CORRECT!
An Internet Gateway (IGW) must be attached to allow internet communication.

Score so far: 2/2

Type A, B, C or D...

Q1: Beginner · Correct Answer: B) IP address range notation | Q2: Beginner · Correct Answer: C) Internet Gateway

Mobile Chat View — Questions 3 & 4

9:41 AWS VPC Quiz

Question 3 of 15 (Beginner):
What determines whether a subnet is public?

A) It has instances with public IPs
B) It has a route to an Internet Gateway
C) It uses a /24 CIDR block
D) It has a NAT Gateway attached

Type A, B, C, or D

B

✓ CORRECT!
A subnet is public if its route table routes to an IGW.

Score so far: 3/3

Type A, B, C or D...

9:41 AWS VPC Quiz

Question 4 of 15 (Beginner):
What is required for an EC2 instance in a public subnet to access the internet?

A) NAT Gateway only
B) Internet Gateway and public IP
C) Transit Gateway
D) VPC Peering

Type A, B, C, or D

B

✓ CORRECT!
Both an IGW route and a public/Elastic IP are required.

Score so far: 4/4

Type A, B, C or D...

Q3: Beginner · Correct Answer: B) It has a route to an Internet Gateway | Q4: Beginner · Correct Answer: B) Internet Gateway and public IP

Mobile Chat View — Questions 5 & 6

9:41 AWS VPC Quiz

Question 5 of 15 (Beginner):
What is the primary function of a NAT Gateway?

A) Accept inbound internet traffic
B) Provide outbound internet access for private subnets
C) Enable DNS resolution
D) Connect VPCs together

Type A, B, C, or D

B

✓ CORRECT!
NAT Gateway allows private subnets outbound access while blocking inbound.

Score so far: 5/5

Type A, B, C or D...

9:41 AWS VPC Quiz

Question 6 of 15 (Beginner):
What is an Elastic Network Interface (ENI)?

A) Load balancer
B) Virtual network interface attached to EC2
C) NAT service
D) VPN endpoint

Type A, B, C, or D

B

✓ CORRECT!
An ENI is a virtual network interface with a private IP, MAC address, and security groups.

Score so far: 6/6

Type A, B, C or D...

Q5: Beginner · Correct Answer: B) Provide outbound internet access for private subnets | Q6: Beginner · Correct Answer: B) Virtual network interface attached to EC2

Mobile Chat View — Questions 7 & 8

9:41 AWS VPC Quiz

Question 7 of 15 (Beginner):
Which AWS service provides DNS and domain registration?

A) CloudFront
B) Amazon Route 53
C) API Gateway
D) Global Accelerator

Type A, B, C, or D

B

✓ CORRECT!
Amazon Route 53 provides DNS resolution, domain registration, and routing policies.

Score so far: 7/7

Type A, B, C or D...

9:41 AWS VPC Quiz

Question 8 of 15 (Intermediate):
What is the main difference between Security Groups and NACLs?

A) Security Groups are stateless
B) NACLs are stateful
C) Security Groups are stateful
D) NACLs apply to instances only

Type A, B, C, or D

C

✓ CORRECT!
Security Groups are stateful; NACLs are stateless and evaluated in rule order.

Score so far: 8/8

Type A, B, C or D...

Q7: Beginner · Correct Answer: B) Amazon Route 53 | Q8: Intermediate · Correct Answer: C) Security Groups are stateful

Question 8 of 15 (Intermediate):
What is the main difference between Security Groups and NACLs?

A) Security Groups are stateless B) NACLs are stateful
C) Security Groups are stateful D) NACLs apply to instances only

Type A, B, C, or D to answer.

C

✓ CORRECT! Security Groups are stateful; NACLs are stateless and evaluated in rule order.
Score so far: 1/1

Question 9 of 15 (Intermediate):
NACL rules are processed in which order?

A) Random B) All at once
C) By rule number, lowest first D) Alphabetically

Type A, B, C, or D to answer.

C

✓ CORRECT! NACL rules are evaluated in ascending rule number order; first match applies.
Score so far: 2/2

Next up: Question 10

Type your answer (A, B, C or D)... Send

Q8: Intermediate · Correct Answer: C) Security Groups are stateful | Q9: Intermediate · Correct Answer: C) By rule number, lowest first

Question 10 of 15 (Intermediate):
Which statement about VPC Peering is correct?

A) It supports transitive routing B) It does not support transitive routing
C) It replaces Direct Connect D) It requires NAT Gateway

Type A, B, C, or D to answer.

B

✓ CORRECT! VPC Peering enables direct VPC communication but does NOT allow transitive routing.
Score so far: 3/3

Next up: Question 11

Question 11 of 15 (Intermediate):
Which service enables hub-and-spoke connectivity across multiple VPCs?

A) VPC Peering B) Site-to-Site VPN
C) AWS Transit Gateway D) Internet Gateway

Type A, B, C, or D to answer.

C

✓ CORRECT! Transit Gateway acts as a central hub for multiple VPCs with transitive routing.
Score so far: 4/4

Next up: Question 12

Type your answer (A, B, C or D)... Send

Q10: Intermediate · Correct Answer: B) It does not support transitive routing | Q11: Intermediate · Correct Answer: C) AWS Transit Gateway

Question 12 of 15 (Intermediate):
What is a key advantage of AWS Direct Connect over VPN?

A) Uses public internet B) Lower and more predictable latency
C) Faster setup D) No physical connection required

Type A, B, C, or D to answer.

B

✓ CORRECT! Direct Connect provides dedicated connectivity with consistent, lower latency.
Score so far: 5/5

Next up: Question 13

Type your answer (A, B, C or D)... **Send**

Question 13 of 15 (Intermediate):
Which load balancer operates at Layer 7?

A) Network Load Balancer B) Gateway Load Balancer
C) Classic Load Balancer D) Application Load Balancer

Type A, B, C, or D to answer.

D

✓ CORRECT! ALB operates at Layer 7 (HTTP/HTTPS) and supports content-based routing.
Score so far: 6/6

Next up: Question 14

Type your answer (A, B, C or D)... **Send**

Q12: Intermediate · Correct Answer: B) Lower and more predictable latency | Q13: Intermediate · Correct Answer: D) Application Load Balancer

Question 14 of 15 (Intermediate):
What is the purpose of a VPC Interface Endpoint?

A) Internet access B) Private access to AWS services via PrivateLink
C) VPC-to-VPC routing D) IP address translation

Type A, B, C, or D to answer.

B

✓ CORRECT! Interface Endpoints enable private AWS service access using PrivateLink.
Score so far: 7/7

lex.aws.amazon.com/vpc-quiz-bot

AWS VPC Quiz Bot | CloudLearners Inc.

Question 15 of 15 (Intermediate):
Which AWS service enables private connectivity between VPCs without peering?

A) Internet Gateway B) AWS PrivateLink
C) Elastic IP D) CloudFront

Type A, B, C, or D to answer.

B

✓ CORRECT! AWS PrivateLink enables private VPC communication without peering or internet.
Score so far: 8/8
